FULLSTACK DEVELOPER

I'm highly creative, while simultaneously being analytical. I also speak Spanish and have a love of languages. These skills have helped me grow quickly as a software developer, being able to learn and recognize patterns quickly and think outside the box on implementing ideas in code.

TECHNICAL & INTERPERSONAL SKILLS

Languages: TypeScript, JavaScript, HTML, CSS, SQL, JSON, EJS
Libraries and Frameworks: React.js, Express.js, Bootstrap
Databases and other: Postgres, Sequelize, MongoDB, Mongoose, RESTful Routing, JSON API, Git, Postman, Google OAuth
Interpersonal skills: Strong emphasis on communication, teamwork, and leadership

TECHNICAL PROJECTS

PSYNCH - [GitHub](#) | [App](#) - React | JavaScript | MongoDB | Mongoose.js | Postman | CSS | HTML
A social networking app to communicate and keep track of your friends and your own emotions!
- Developed an intuitive MERN stack app as a team utilizing, taking lead on backend development, feature implementation, and GitHub management, with 500 commits in 5 days.
- Implemented multiple features, including user authentication, the ability to add and chat with friends, receive message notifications, create posts, comment and add reactions to other users' posts, and set posts to public or private, thereby expanding or narrowing the viewing audience for a user's posts.
- Created a stats section in the app, which takes all posts a user has created, divides the posts into six broader categories, and displays to the user their current status, their total number of posts, the number of posts in each category, and their top three categories by percentage, thus allowing them to monitor and track their overall emotional wellbeing.

Colorizz - [GitHub](#) | [App](#) - TypeScript | React | JavaScript | PostgreSQL | Sequelize | Postman | CSS | HTML
An app for watercolor artists to manage and keep track of the paints that they are using.
- Developed a responsive PERN stack app, utilizing TypeScript to ensure app stability, and React to create a responsive feel that dynamically rendered page elements.

The Dog Park -[GitHub](#)|[App](#) - JavaScript| Express.js | Mongoose.js | MongoDB | CSS | HTML | OAuth
A blogging and networking app for dog owners!
- Developed a blogging and social networking app focused on dog owners, with user authentication using Google OAuth, full CRUD with various models, with selected features available only to logged-in users.
- Implemented two methods to add friends and connect users, utilizing a friend request system in which requests need to be accepted by the other user, and a friend code system that allows users to connect immediately.

Maze Raider - [GitHub](#) | [App](#) - JavaScript | CSS | HTML
A choose-your-own-adventure game with multiple storyline branches and logic.
- Created an app with user interactivity in mind, utilizing a balance of timers, counters, and event listeners to determine outcomes.

EXPERIENCE

MK1 Manufacturing, Manufacturing Technician   *West Jordan, UT, 01/2022 - 10/2022*
- Used CNC machinery, powder coat, and hand tools to construct rack mounts for various computers.
- Worked with the owner to edit designs, in order to create a standardized product and increase efficiency.
- Trained new employees on how to use all the tools and machinery, and how to manage workflow effectively.

EDUCATION

General Assembly   *Remote, 11/2022 - 03/2023*
Full-stack software engineering 420+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies.
